

«Regulatory Tracking»

Swiss Legal Tech
Hackathon & Conference

Zurich, 2.10-4.10.2017

«Can't see the forest for the trees».

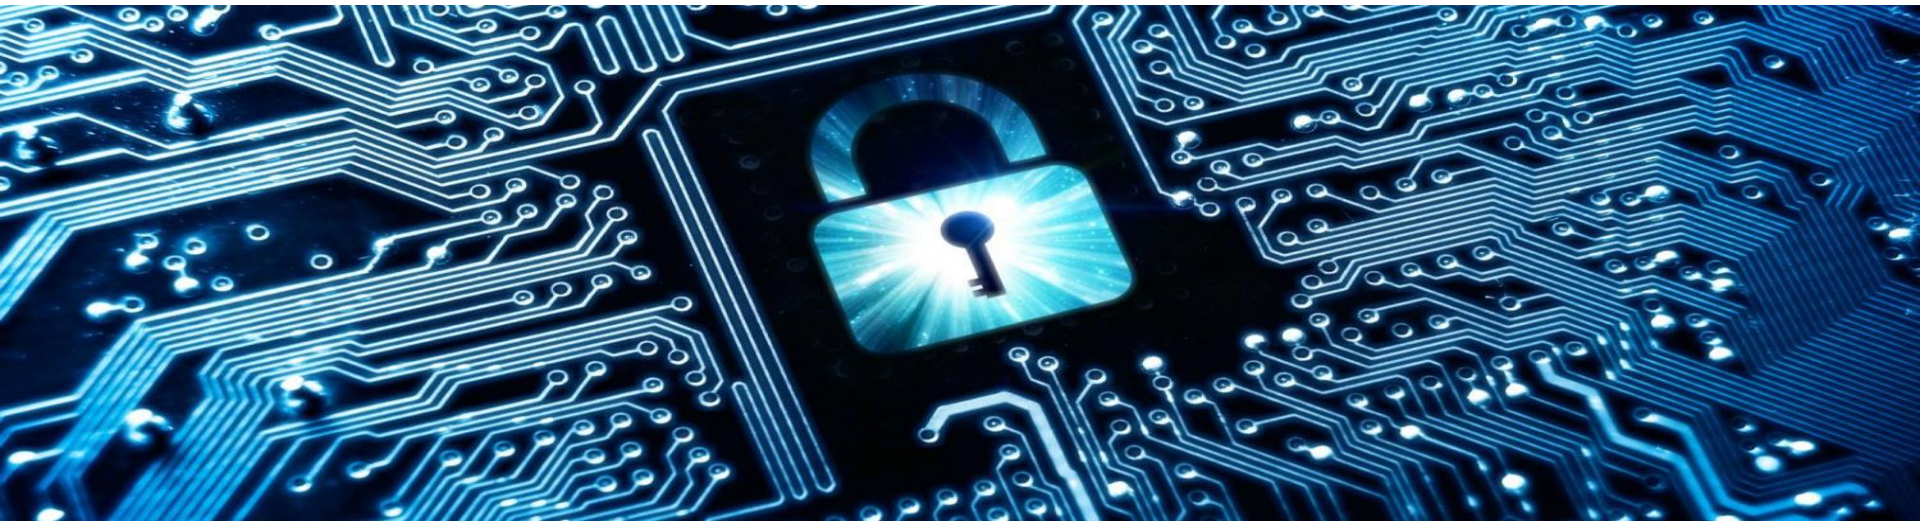

- Countless and rapidly changing rules and regulations to comply with.
- Countless sources disseminate information, i.e. no «One-Stop-Shop» solution available.
- Significant «manual» research work.

Problem

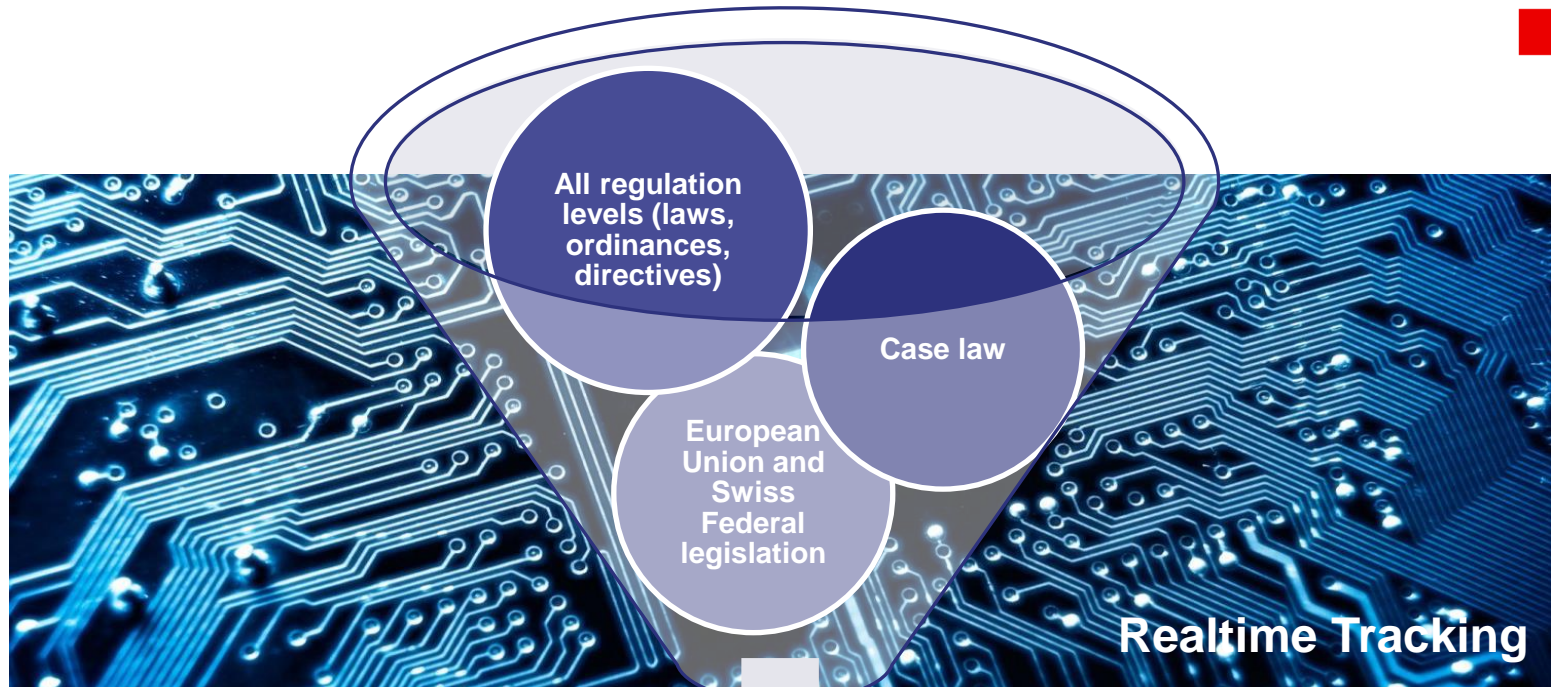

Swiss Federal Data Protection Act as an example.

«Profiling» • «Privacy by Design» • «Big Data» • «Data Protection Impact Assessment»

DSG • VE-DSG • DSGVO • Federal Data Protection and Information Commissioner • ...

Approach

Machine Learning, Natural Language Processing (NLP), Deep Learning

Notification of relevant changes and developments via push alerts

Concise visualisation and summary of relevant information

Measures to be implemented in order to ensure compliance

Product Prototype

Simpler. Better. Faster.

- Keeping up with the ever evolving regulatory landscape.**
- Saving resources.**
- Avoiding information overload.**
- Ensuring compliance of the business at all times.**

Advantages
